OUR VISION

In an era where global economic, technological, and geopolitical balances are being reshaped, our vision is to become one of the world's most respected civil dialogue and interaction platforms for the global economy — one that places people at its core, embraces peace and cooperation as fundamental pillars of economic development, and pioneers the development of sustainable, trust-based relationships among countries, institutions, and sectors. By anticipating and guiding change, and by drawing strength from Istanbul's historical legacy and strategic position, we aim to become a permanent global hub that builds not only economic bridges between continents, but also fosters trust, mutual understanding, and a shared vision for the future.

OUR MISSION

Our mission is to bring together representatives from the global business community, public sector, diplomacy, and academia on a common platform; to address the dynamics of the new economic order through a multidimensional perspective; to contribute to the development of international investment and cooperation opportunities; and to support the establishment of lasting, trust-based, and sustainable relationships among stakeholders. By recognizing human well-being, economic development, and global peace as complementary elements, we aim to contribute to a more balanced, inclusive, and sustainable global economic future through dialogue, cooperation, and collective wisdom.

OUR PURPOSE

The primary purpose of the Istanbul Economy Summit is to bring together the key actors shaping the global economy on an Istanbul-centered international platform, in order to understand, interpret, and contribute to shaping the dynamics of the new economic order. In this context, the Summit aims to:

- Contribute to the development of international investment, trade, and strategic cooperation opportunities,
- Address global economic, technological, and sociological transformations through a multidimensional perspective,
- Establish a strong, lasting, and results-oriented dialogue platform among public institutions, the private sector, diplomacy, and academia,
- Position Istanbul as a leading global meeting point for economy, diplomacy, and cooperation,
- Enhance the international visibility of Türkiye's economic vision, potential, and capacity for cooperation,
- Foster the development of concrete projects, strategic partnerships, and long-term collaborations among stakeholders,
- Strengthen the link between sustainable economic development and global peace, stability, and social prosperity.

İCRA KURULU BAŞKANI ABDULLAH DEĞER İstanbul Ekonomi Zirvesi, 11-12 Aralık'ta gerçekleşecek

Küresel ekonomi, enerji, sürdürülebilirlik ve dijital dönüşüm alanlarında dünyanın önde gelen iş ve fikir liderlerini bir araya getiren İstanbul Ekonomi Zirvesi, bu yıl "Yeni Dengeler & Küresel İş Birlikleri" temasıyla 11-12 Aralık 2025 tarihlerinde Çırağan Sarayı'nda gerçekleştirilecek. İki gün sürecek zirvede ekonomi, finans, enerji, turizm, teknoloji, sanayi, gayrimenkul, sağlık, eğitim, gıda ve girişimcilik gibi farklı alanlar-

dan iş dünyasının liderleri bir araya gelerek yeni küresel düzenin dinamiklerini masaya yatırarak. Zirvenin İcra Kurulu Başkanı Abdullah Değer, bu yılki temanın küresel dönüşüm sürecinde Türkiye'nin rolünü vurgulamak açısından özel bir anlam taşıdığını belirterek, "Dünyada ekonomik güç dengeleri yeniden şekilleniyor. Bu yeni dönemde Türkiye, stratejik konumu ve üretim gücüyle küresel iş birliklerinin merkezinde yer alıyor. 2025 İstanbul Ekonomi Zirvesi'nde, bu dönüşüm sürecinde ülkemizin nasıl daha etkin bir rol üstlenebileceğini ele alacağız. Zirvenin iş dünyası için yeni ortaklıklara ve uzun vadeli yatırımlara kapı açacağını"

haber7.com

Geçtiğimiz haftanın en önemli etkinliği İstanbul Ekonomi Zirvesi idi. "Yeni Dengeler ve Küresel İşbirliği" başlığı ile toplanan zirvede farklı ülkelerden çok sayıda katılımcı, ekonomi ve iş dünyasının önemli sorunlarını tartıştı.

Zirvenin açılış oturumunu yönetmek bana kismet oldu. Arjantin, İngiltere ve Türkiye'den katılan konuşmacılar ile beraber hem Türkiye hem de dünya için çok önemli olan bir sektörü, turizmi konuştuk.

Enflasyonda belirgin düşüş 2024 ortasında

CUMHURBAŞKANI Yardımcısı Cevdet Yılmaz, ekonomide belirsizliği azaltacak ve öngörülebilirliği artıracak çalışmalara hız verdiklerini söyledi. 7. İstanbul Ekonomi Zirvesi'nde konuşan Yılmaz, Türkiye'nin nominal dolar bazında şu an dünyanın 17. büyük ekonomisi olduğunu söyledi. Yılmaz, "Bu yılın 9 ayında 4.6 büyüme kaydettik. İşsizlik oranı yüzde 8.9. 5 yıllık kredi risk primi CDS oranları son 2.5 yılın en düşük seviyelerine

'Ekonomi yıl sonunda 1.1 trilyonluk büyüklüğe ulaşır'

EKONOMİ SERVİSİ

CUMHURBAŞKANI Yardımcısı Cevdet Yılmaz, "2023 yılında ekonominin 1.1 trilyona yakın büyüklüğe ulaşmasını bekliyoruz. G7'ye göre bu yıl yüzde 4.4 civarında bir büyüme ile kapatacağımızı öngörüyoruz. 2024'ün ortalarından itibaren enflasyonda belirgin bir şekilde düşüş gerçekleşecek" dedi. 7. İstanbul Ekonomi Zirvesi'ne katılan Yılmaz, Türkiye ekonomisinin yılsonu rakamları ve gelecek dönemdeki gelişmeler için bilgiler verdi. Yılmaz yatırım, istihdam, üretimi ve ihracatı destekleyici politikaları, büyümeyi ve öngörülebilirliği Türkiye'nin bazında şu an

REZERVLERE ARTIŞA DİKKAT ÇEKTİ

Merkez Bankası'nın izlediği yeni politikasının sonuçlarını değerlendiren Yılmaz, "Bu yıldan itibaren rezervlerimizin 98.5 milyar dolara kadar düşmüştü. Dün itibarıyla yeniden 140 milyar doları aşmış durumdayız. Bu da Türkiye için bir rekor. Bu taraftan bütçe açığını kontrol edebilmek diğer taraftan da enflasyonla mücadelede önemli bir adım olacaktır" dedi.

Yılmaz, "2023 yılında ekonominin 1.1 trilyona yakın büyüklüğe ulaşmasını bekliyoruz. IMF verilerine göre 17. büyük ekonomi konumunda olacağız. Satın alma gücü paritesine göre Türkiye dünyanın 11. büyük ekonomisi konumunda" dedi. Yatırımlar devam etmesini beklediğini belirten Yılmaz, "Bu yılın 9 ayında 4.6 büyüme kaydettik. İşsizlik oranı yüzde 8.9. 5 yıllık kredi risk primi CDS oranları son 2.5 yılın en düşük seviyelerine

Birinci önceliğin enflasyonla mücadele olduğunu belirten Cevdet Yılmaz, "Çekirdek enflasyon yüzde 2'nin altına indi. 2024'ün ortalarından itibaren enflasyonda belirgin düşüş olacak" dedi

CUMHURBAŞKANI Yardımcısı Cevdet Yılmaz, ekonomide belirsizliği azaltacak ve öngörülebilirliği artıracak çalışmalara hız verdiklerini söyledi. "Sürdürülebilir Yaşam ve Akıllı Şehirler" temasıyla düzenlenen 7. İstanbul Ekonomi Zirvesi'nde konuşan Yılmaz, Türkiye'nin nominal dolar bazında şu an dünyanın 17. büyük ekonomisi olduğunu söyledi.

1.1 TRİLYON DOLARLIK EKONOMİ

Yılmaz, "2023 yılında ekonominin 1.1 trilyona yakın bir büyüklüğe ulaşmasını bekliyoruz. IMF verilerine göre 17. büyük ekonomi konumunda olacağız. Satın alma gücü paritesine göre Türkiye dünyanın 11. büyük ekonomisi konumunda" dedi. Yatırımlar devam etmesini beklediğini belirten Yılmaz, "Bu yılın 9 ayında 4.6 büyüme kaydettik. İşsizlik oranı yüzde 8.9. 5 yıllık kredi risk primi CDS oranları son 2.5 yılın en düşük seviyelerine indi. Şu anda 330'lar civarında. Bu yılın mayıs ayında 700'lere kadar yükseldi" dedi.

Cevdet Yılmaz, enflasyonla mücadelede belirgin düşüş olduğunu söyledi. "Birinci önceliğimiz enflasyonu aşağıya çekmek, makro finansal istikrarımızı güçlendirmek. Bu çerçevede güçlü bir şekilde enflasyonla mücadelede başlamakta olduğumuz çalışmalar hızla devam ediyor. Yarı aylık enflasyon yüzde 2'nin altına inmiş durumdayız. Enflasyonla mücadelede belirgin düşüşleri görmeye başladık. Yıllık etkiyi ise 2024'ün ortalarından itibaren görmeye başlayacağız. 2024'ün ortalarından itibaren enflasyonda belirgin düşüş gerçekleşecek" diye konuştu.

REZERVLER REKOR KIRDI

Merkez Bankası'nın yeni bir politika izlediğini belirten Cevdet Yılmaz, bunun sonuçlarını rezerv rakamlarında görmeye başladıklarını söyledi. Merkez Bankası'nın rezervlerinin mayıs ayında 98.5 milyar dolara kadar düştüğünü anımsatan Yılmaz, "140 milyar doları aşmış durumdayız. Bu da Türkiye için bir rekor. Tarihimizde hiç bu seviyeye gelmemişti" şeklinde konuştu.

AKSAM

Rezervleri daha da güçlendireceğiz

CUMHURBAŞKANI Yardımcısı Yılmaz, Merkez Bankası rezervlerinin 140 milyar doları aştığını belirterek "Merkez Bankası rezervlerimizde büyük bir artış oldu. Bunun için Merkez Bankası yönetimimizi, politikalarımızı tebrik ediyoruz. Daha da güçlendireceğiz rezervlerimizi" dedi. Yılmaz, "Sürdürülebilir Yaşam ve Akıllı Şehirler" temasıyla düzenlenen 7. İstanbul Ekonomi Zirvesi'nde yaptığı konuşmada, ekonomide öngörülebilirliği artıracak çalışmalara hız verdiklerini söyledi.

İstanbul Ekonomi Zirvesi... Cumhurbaşkanı Yardımcısı Yılmaz açıkladı! Güven ortamını pekiştiriyoruz

Cumhurbaşkanı Yardımcısı Cevdet Yılmaz, İstanbul Ekonomi Zirvesi'nde önemli mesajlar verdi. Cumhurbaşkanı Yardımcısı Yılmaz, "Ekonomide öngörülebilirliği artırmayı hızlandırıyoruz. Güven ortamını pekiştiriyoruz" dedi.

Tatar: Tanınma başka günü bekleyebilir, şimdi yapılması gereken iş birliğidir

Cumhurbaşkanı Esin Tatar, Kıbrıs'ta iki devletin iş birliğiyle geleceğe yön verilmesi gerektiğini kaydederek, "Tanınma başka bir günü bekleyebilir. Siyasi çözüm başka bir günü bekleyebilir. Ama şimdi yapılması gereken doğal kaynaklar dahil tüm önemli konularda iki devletin, iki otoritenin iş birliğidir" dedi.

Cumhurbaşkanı Tatar, İstanbul'daki temasları kapsamında Çarşamba Sarayı'nda yapılan 7'nci İstanbul Ekonomi Zirvesi'nde yaptığı konuşmasını yaptı.

Bu yıl "Sürdürülebilir Yaşam ve Akıllı Şehirler" temasıyla Koluman Otomatik Endüstri A.Ş.

önlüğü reddediyoruz, reddedileceği" dedi.

"KIBRIS TÜRK HALKININ ADADAKİ YÖNETİM TARİHİ 60 YILI BULMUŞTUR"

Tatar, Türkiye'nin yerel yönetimlerinin korunmasını ve güvenliğinin sağlanmasını beklediğini, KİTC'ye ilişkin elbette söz sahibi olduğunu ifade ederek, Kıbrıs'ta Türkiye'nin Doğu Akdeniz'den dışlanmaması için mücadele ettiğini söyledi.

Tatar, Doğu Akdeniz'deki istikrarın devam etmesi için dengeyi paylaşmanın Türkiye'nin çıkarına olduğunu söyledi. Tatar, Cumhurbaşkanı Erdoğan'ın Atina ziyareti çerçevesinde doğal gaz anlaşması için görüşmeler olduğunu ifade eden Tatar, bu çerçevede bir çözümlerin Kıbrıs'ta her iki taraflı ekonomik anlamda büyük yararlar sağlanabileceğini söyledi. Türkiye Cumhuriyeti'nin limanları ve hava sahalarını Güney Kıbrıs'a açılmasıyla, ortaya büyük kazançlar çıkacağını ifade etti.

Tatar, 1963 yılında yıllık lejant başına düşen gelirin 300 dolar civarında olduğunu, bu rakamın 1974'ten sonra 500 dolara çıktığını, şimdi ise tüm rakamların yaklaşık 15 bin civarında olduğunu kaydetti.

5. İstanbul Ekonomi Zirvesi'nde "yeşil ekonomi" ele alındı

5. İstanbul Ekonomi Zirvesi, "Yeşil Ekonomi" ana temasıyla Kalyon PV ana sponsorluğunda Çırağan Sarayı'nda gerçekleştirildi.

Zirvenin İcra Kurulu Başkanlığına getirilen eski Devlet Bakanı ve İstanbul Ekonomi Zirvesi Yürütme Kurulu Başkanı Kürşad Tüzmen ile İstanbul Ekonomi Zirvesi İcra Kurulu Başkanı Abdullah Değer ev sahipliği yaptı.

Zirve, Türkiye'nin ve dünyanın genel durumuna yönelik bir dikkatli tanıtım filmi ile başladı. Filmde, küresel ısınma, Covid-19 salgını, iklim değişikliği, tedarik zincirindeki zayıflama, doğaya verilen zarar ve mevcut hali ile ekonomilerin nasıl aşırı tüketim ve çevre risklerine karşı önlemler alınmalı, çevresel riskleri azaltıcı yatırımların "yeşil ekonomi" ile nasıl karakterize edildiği, fosil yakıtlar yerine yenilenebilir enerji kaynaklarına yatırım yapılması gerektiği üzerinde duruldu.

Ekonomi Zirvesi'ne dolar ve euro lu elbise damga vurdu

İstanbul Ekonomi Zirvesi kapsamında düzenlenen defilede, aynı zamanda İstanbul Ekonomi Zirvesi'nin İcra Kurulu üyesi de olan modacı Gülcan Selçuk'un gönderme olarak sadece dolar ve euro ile tasarladığı elbise dikkat çekti.

Türkiye'nin üretim odaklı modele geçmesi gerektiği vurgulandı. Türkiye'nin üretim odaklı modele geçmesi gerektiği vurgulandı. Türkiye'nin üretim odaklı modele geçmesi gerektiği vurgulandı.

ISTANBUL ECONOMY SUMMIT IN THE PRESS

Çırağan Sarayı'nda düzenlenen 2. İstanbul Ekonomi Zirvesi'nde konuşan TBMM Başkanı Binali Yıldırım, "Kriz var diye ölüük bittik diye bir şey yok. Daha kötüsünü biz gördük" dedi. Yaşanan sıkıntıların mutlaka üstesinden gelineceğini ifade eden Yıldırım, "Bir müddet ayağımızı yorganımıza göre uzatacağz" dedi.

TBMM BAŞKANI BINALI YILDIRIM, ÇIRAĞAN SARAYI'NDA BU YIL İKİNCİSİ "KÜRESEL TİCARET SAVAŞINDA TÜRKİYE'DEKİ YATIRIM FIR- > TBMM Başkanı Binali Yıldırım, Türkiye'nin ekonomik bazı sıkıntılarla karşı karşıya olduğunu bir sır olmadığını belirterek, "Bir sıkıntımız var. Bir müddet ayağımızı"

İstanbul Ekonomi Zirvesi, TBMM Başkanı Yıldırım'ın katılımıyla başladı. Zirvede konuşan Yıldırım, "Yaşadığımız sıkıntıların üstesinden mutlaka geleceğiz. Çünkü tecrübelerimiz hükümetimiz aıyor. Reel sektörün bilançolarının bazılmaması için gereken yolları denemeye gidiyoruz. Bir müddet ayağımızı yorganımıza göre uzatacağz" dedi.

MECLİS Başkanı Yıldırım, İstanbul Ekonomi Zirvesi'nde konuştu: Endişeye gerek yok. Bunlar gelip geçicidir. Bugünler aynı zamanda da fırsat günleridir. Herkesin durduğu yerde yatırım yapan kazanır.

Zirveye katılan konuşmacılar özetle şu mesajı verdiler: > TBMM Başkanı Binali Yıldırım, Çırağan Sarayı'nda düzenlenen 2. İstanbul Ekonomi Zirvesi'nde konuştu: Endişeye gerek yok. Bunlar gelip geçicidir. Bugünler aynı zamanda da fırsat günleridir. Herkesin durduğu yerde yatırım yapan kazanır.

Yatırım yapan kazanır. Katılıma daha çok oyuncu lazim. TBMM Başkanı Binali Yıldırım, İstanbul Ekonomi Zirvesi'nde konuştu: Endişeye gerek yok. Bunlar gelip geçicidir. Bugünler aynı zamanda da fırsat günleridir. Herkesin durduğu yerde yatırım yapan kazanır.

"SANAYİ YERİNE İNŞAATA YATIRIM BÜYÜK HATAYDI"

DEİK LÜKSEMBURG İS KONSEYİ BAŞKANI PINAR ECZACIBASI, "TÜRKİYE SON DÖNEMLERDE SANAYİDEKİ BİRİKİMİ İNŞAAT SEKTÖRÜNDE HARCAYARAK ÇOK YANLIŞ BİR YOL İZLEDİ" İFADELERİNİ KULLANDI.

> İSTANBUL Ekonomi Zirvesi'nin ikincisi düzenlendi. Zirvede konuşan Ankara Sanayi Odası Başkanı Nurettin Özdebir, "Üretim ve sanayi önceliğimiz olmalı" derken; TÜRKONFED Başkanı Yardımcısı Ali Avcı, "Geçici parsamamlar değil kalıcı reformlar gerek" diye konuştu.

MECLİS Başkanı Binali Yıldırım, "Bugünler fırsat günleridir. Bugünler aynı zamanda da fırsat günleridir. Herkesin durduğu yerde yatırım yapan kazanır. Bu da yatanın kazandığı birer fırsattır" dedi.

Gülle: 200 milyar \$'lık ihracat hedefimiz

Binali Yıldırım: Ayağımızı yorganımıza göre uzatacağz

MECLİS BAŞKANI BINALI YILDIRIM, ÇIRAĞAN SARAYI'NDA BU YIL İKİNCİSİ "KÜRESEL TİCARET SAVAŞINDA TÜRKİYE'DEKİ YATIRIM FIR- > TBMM Başkanı Binali Yıldırım, Türkiye'nin ekonomik bazı sıkıntılarla karşı karşıya olduğunu bir sır olmadığını belirterek, "Bir sıkıntımız var. Bir müddet ayağımızı"

Küresel Ticaret Savaşında. Sanayi yerine inşaat çok yanlış bir yol. TBMM Başkanı Binali Yıldırım, İstanbul Ekonomi Zirvesi'nde konuştu: Endişeye gerek yok. Bunlar gelip geçicidir. Bugünler aynı zamanda da fırsat günleridir. Herkesin durduğu yerde yatırım yapan kazanır.

ISTANBUL ECONOMY SUMMIT IN THE PRESS

İstanbul'da 4 milyarlık buluşma

Türkiye'nin en büyük ekonomi organizasyonlarından **İstanbul Ekonomi Zirvesi**, 10 ülkeden 500 iş insanının katılımıyla başladı. Bugün Çırağan sarayında TBMM Başkanı Binali Yıldırım'ın açılış konuşmasıyla başlayacak olan zirvede yerli ve yabancı yatırımcıların arasında 4 milyar TL değerinde yatırım ve iş görüşmesi hedefleniyor. Zirvede 7 ana sektörde düzenlenecek panellere iş dünyasının önde gelen isimleri konuşmacı olarak katılacak. Program sonunda Altın Değerler Ödül töreninde ise alanında başarılı kişi ve kurumlara ödül verilecek.

Teknoparklardan 4.0 zirvesine büyük ilgi

TÜRKİYE'NİN endüstri 4.0'da geldiği seviyenin masaya yatıracağı 25 Aralık'taki İstanbul Ekonomi Zirvesi, teknoparkların akınına uğrayacak. İçerisinde yerli ve yabancı şirketlerin de bulunduğu teknoparklar, İstanbul Ekonomi Zirvesi etkinliğinde geleceği tartışacak. Gebze, Bursa, Ankara ve İzmir'deki teknoparkların yer alacağı zirveye, Ekonomi Bakanlığı'nı temsil eden de Bakan Yardımcısı Fatih Çiğeci katılacak.

Moda gösterisi ve akşam da ödül töreninin olacağı zirvede, sektörlerin endüstri 4.0 alanında neler yapıldığı ve ne yapması gerektiği tartışılacak. Zirvenin organizasyonunu yapan Cool Reklam Ajansı Başkanı Abdullah Değer, TABA, TÜGİK ve TÜGİAD'ın da destek verdiğini söyledi.

Değer, "Her zaman her zorluğa rağmen güçlü kalmayı başarımız ekonomimizin bugün nerede olduğunu irdelerken, teknolojik devrimler aylık yaşanan etkiler için ne tür çalışmalar yapılması gerektiğini masaya yatıracağız. Dördüncü sanayi devriminin ne olduğu ve Türkiye olarak dördüncü sanayi devriminin ne kadar içerisinde olduğumuzu görmek ve bir yol haritası belirlemek amaçlarımız arasında" dedi.

Zirveye, daha çok yabancı şirketlerin gelmesini istediklerini belirten Değer, özellikle ABD ile yapılan ticaretin de masaya yatırılması gerektiğini söyledi. Değer, "Zirveye TABA da destek veriyor. Bizim ABD ile yaptığımız ticarete açık ara onlar önde. Bunun böyle olamayacağını Türkiye'nin de kazanmasını gerektiğini söyleyeceğim. Bugün dünya teknoloji üreticilerinin ürünlerini alırsanız, size başka şeyleri üretme hakkı verirler. Bunun böyle olmasını lazım. Zirve bu konuda farkındalık yaratacak" dedi.

Moda gösterisi yapılacak
ABDULLAH DEĞER, Türkiye'nin artık yükte hafif pahada ağır ürünler üretmesi gerektiğini de belirterek, "Bu ürünler aynı zamanda teknolojinin etkin kullanımına yönelik ürünler üretmek" dedi. Değer, gelecekteki hale getirecekleri zirvede, "Özellikle Cumhuriyetin Moda" defilesi yapacağını da söyledi. Değer, "Başarıyı şirketlere başaran plaketi vereceğim. Bu da şirketlerin çalışmalarının hakkını teslim etmek için yapılacak" diye konuştu.

ENDİŞEYE GEREK YOK

TBMM Başkanı Binali Yıldırım, Çırağan Saray'ında düzenlenen **İstanbul Ekonomi Zirvesi**'nde konuştu. Ekonomide bariyerlere karşı karşıya kaldığımızın sarımadığını dile getiren Başkan Yıldırım, sorunları sebeplerine bakılması gerektiğini ve tespitini doğru yapmanın önemli olduğunu belirtti.

Sorunlarla baş edeceğiz

Türkiye'nin dünyanın ilk 20 ekonomisi içerisinde yer aldığına değeri cümle çekti. "Yüzlerce yıla uzanan tarihi tecrübelerimizin ışığında karşılaştığımız sorunlarla baş edeceğiz. Bilgiye, beceriye, yeteneğe ve sıvı sermayeye sahibiz. Nüfusumuz 83 milyon. Bu nüfusun 370 bini genç. Bu bizim en büyük gücümüz, en büyük kaynağımız, en büyük güvenimizdir" dedi.

Ayakta kaldık

Daha hızlı kararlar aldığımızı kaydeden Yıldırım, "Yüz var diye büyük bütçe demeye kızmam. 2001'de 44,5 milyar

Borsanın kayıp haftası
Mevcut durumda Borsa İstanbul, 2018 yılının en kötü haftasını yaşıyor. 12 Ocak'ta rekor düşüş yaşayan borsanın, 12 Ocak'ta rekor düşüş yaşayan borsanın, 12 Ocak'ta rekor düşüş yaşayan borsanın...

İstanbul Ekonomi Zirvesi 25 Aralık'ta

TÜRKİYE'NİN fikir önderleri ve kurumları, ileri teknolojinin geleceğini tartışacak. Cool Reklam Ajansı Başkanı Abdullah Değer ve Aydın Üniversitesi'nin organizasyonu ile gerçekleştirilecek olan zirve, 25 Aralık'ta Çırağan Sarayı'nda yapılacak. Zirvenin İcra Kurulu Başkanı ise Sağlık eski Bakanı Bülent Akarcalı

olacak. Zirve ile ilgili açıklama yapan Akarcalı, "Her zorluğa rağmen güçlü kalmayı başarımız ekonomimizin bugün nerede olduğunu irdelerken, teknolojik devrimler aylık yaşanan etkiler için ne tür çalışmalar yapılması gerektiğini masaya yatıracağız. Dördüncü sanayi devriminin ne olduğu ve Türkiye olarak dördüncü sanayi devriminin ne kadar içerisinde olduğumuzu görmek ve bir yol haritası belirlemek amaçlarımız arasında"

WORLD PEACE RECEPTION

The World Peace Reception, organized within the scope of the Istanbul Economy Summit, brought together representatives from diplomacy, business, and civil society on a common platform, creating a meaningful gathering focused on global peace, economic cooperation, and inclusive development. Held as part of the Summit, the reception delivered strong messages on the economic and social dimensions of peace, with the participation of representatives from different countries and international organizations. The opening speeches of the reception were delivered by UN Women Programme Development Specialist Ana Pashalishvili, SEDEFED Chairperson of the Board Emine Erdem, and Deputy General Manager of the Türkiye Tourism Promotion and Development Agency (TGA), Dr. Elif Balcı Fisunoğlu.

CALL FOR SOLIDARITY AND COOPERATION FOR PEACE

The World Peace Reception once again highlighted the importance of international dialogue and cooperation through shared messages delivered by representatives from different regions. During the evening, Consul General of the Republic of Kosovo in Istanbul Suzana Novobërdaliu, Ambassador of the People's Republic of Bangladesh to Ankara M. Amanul Haq, and Ambassador of the Republic of Burundi to Ankara Didace Ntureka emphasized the importance of world peace and international cooperation.

The cultural program of the evening strongly reflected the themes of peace and cultural diversity through art. With the support of the Ministry of Culture and Tourism of the Republic of Türkiye, the State Folk Dance Ensemble's "Seven Regions of Anatolia" performance brought the rich cultural heritage of Anatolia to the stage, offering a visual feast to the audience. Featuring rhythms, costumes, and dance traditions from different regions of Türkiye, the performance created impressive moments highlighting the unifying power of culture.

The program also featured a World Peace-themed fashion show by Lazaza Couture. Showcasing designs inspired by diverse cultures, the fashion show combined the message of peace with fashion, presenting a powerful narrative through aesthetics, cultural diversity, and shared values. Prepared in the universal language of art, this special segment became one of the most memorable highlights of the evening, reinforcing the themes of peace and solidarity.

ISTANBUL ECONOMY SUMMIT 2025

FINAL DECLARATION

FOREWORD | THE SCOPE OF THE SUMMIT AND ITS GLOBAL IMPACT

For nine years, the Istanbul Economy Summit has been positioned as a strategic platform that addresses the transformation of the global economy from a multidimensional perspective, bringing together public institutions, the private sector, the financial world, international organizations, academia, and civil society on a common ground. Beyond being a gathering where current economic developments are discussed, the Summit provides a global space for collective thinking that shapes the future balances of production, trade, technology, energy, and diplomacy.

Istanbul Economy Summit 2025 brought together more than 2,000 participants this year, hosting ministers, ambassadors, representatives of international organizations, business leaders, financial institutions, academics, and civil society representatives from over 50 countries in Istanbul. Throughout the Summit, panels, special sessions, and roundtable meetings addressed the transformation of the global economy, how new balances will be established, and how international cooperation can be deepened through a multi-layered approach.

The World Peace Reception held within the scope of the Summit stood out as a powerful platform that went beyond economic cooperation, emphasizing peace, dialogue, and shared human values. Representatives from different countries shared their messages on peace, highlighting the direct relationship between peace, economic stability, sustainable development, and social resilience. The Peace Fashion Show and the Seven Regions of Anatolia Dance Performance reinforced the multi-layered structure of the Summit by combining Türkiye's cultural richness with a universal language of peace.

In this respect, Istanbul Economy Summit 2025 was positioned not only as an economic platform, but also as a global meeting point where diplomacy, culture, economy, and a shared vision for the future intersect.

INTRODUCTION | AT THE THRESHOLD OF GLOBAL TRANSFORMATION

Istanbul Economy Summit 2025 was held at a time when the global economy is facing not only cyclical fluctuations but also a structural, multi-layered, and lasting transformation. Increasing geopolitical risks, disruptions in supply chains, debates on energy security, technological acceleration, and global uncertainties are fundamentally reshaping economic decision-making processes.

Within the scope of the Summit, representatives from business, public institutions, finance, international organizations, academia, and civil society approached, from a shared perspective, the questions of how balances will be established in this new era, how global cooperation will be redefined, and on which core dynamics countries will build their competitiveness.

A key conclusion that emerged from the Summit is that competition, growth, and prosperity are no longer shaped solely by cost, speed, and scale, but by resilience, trust, inclusiveness, technological adaptability, and flexibility in the face of crises. Economic success is now evaluated together with strong production infrastructure, qualified human capital, deepening in strategic sectors, and international cooperation.

Within this framework, Istanbul assumes a critical role on the global economic stage with its geostrategic position at the intersection of three continents, strong industrial infrastructure, young and dynamic population, financial capacity, and logistical advantages. The assessments presented throughout the Summit clearly demonstrated the potential of Istanbul and Türkiye not only as a regional production and trade hub, but also as a center where global decisions, partnerships, and new economic models are shaped.

By making this potential visible, Istanbul Economy Summit 2025 strongly emphasized that global transformation can only be managed through collective wisdom, trust-based cooperation, and a long-term vision.

Technology, Digitalization, and 5G: The Foundation of the New Competitive Architecture

At the Summit, technology was addressed as a fundamental infrastructure element of global competition. Artificial intelligence, the data economy, cloud technologies, and digital platforms were evaluated not only as productivity-enhancing tools but also as new determinants of economic sovereignty. In this context, 5G technology emerged as a critical accelerator of digital transformation.

ISTANBUL ECONOMY SUMMIT 2025

FINAL DECLARATION

Key Assessments Highlighted at the Summit:

- 5G is not only faster communication; it is the real-time decision-making infrastructure for industry, healthcare, energy, defense, and logistics.
- Smart factories, autonomous systems, remote healthcare services, and critical infrastructures are not scalable without 5G.
- 5G is the core network technology enabling artificial intelligence applications to be deployed in real-world environments.
- Digital sovereignty is directly linked to strong and secure communication infrastructures.

It was also emphasized at the Summit that 5G investments should be addressed not only under the technology agenda, but also within the perspectives of industrial policies, security strategies, and national competitiveness.

Education, Human Capital, and Skills Transformation

The sustainability of technological progress depends on qualified human capital. At the Summit, it was widely acknowledged that existing education models are insufficient in the face of the transformation driven by digitalization and artificial intelligence.

Key assessments:

- Lifelong learning is a fundamental component of economic competitiveness.
- University–industry collaboration must bridge the gap between theoretical knowledge and practice.
- Digital, analytical, and technical skills should be placed at the center of workforce policies.
- Youth employment and skills transformation are also essential for social resilience.

Economy and Finance: Instruments of the New Era

In an environment of global uncertainty, traditional financing models are insufficient to meet transformation needs on their own. In a period where capital has become more selective, access to long-term funds, managing digital transformation while preserving financial stability, and strengthening cross-border integration are among the key priorities of the new era.

Key conclusions reached at the Summit:

- Capital mobilization is a critical lever: The scale of transformation investments should be expanded not only through individual resources but through catalytic and multiplier-effect models (co-financing, syndication, co-investment, and anchor investor approaches).
- Thematic financing instruments (such as green transition, disaster resilience, SME transformation, and social inclusion) should be used more effectively, with resources linked to measurable impact targets.
- Fintech and digital finance offer concrete opportunities for inclusive growth: They provide speed, accessibility, and cost advantages in payments and transfers; however, trust, transparency, and user protection must remain central to their design.
- Central bank digital currencies (CBDCs) and digital currency infrastructures have the potential to improve efficiency in payment systems, but must be carefully designed in terms of privacy, data protection, cybersecurity, financial stability, and monetary policy implications.
- Digital assets and distributed ledger technology (DLT) are opening a new chapter in capital markets: instruments such as digital bonds may enable T+0/instant settlement, lower operational costs, higher transparency, fractional ownership, and broader investor access.
- Cross-border payments and interoperability are strategic for regional integration. Digital infrastructures, when supported by appropriate regulatory frameworks, can enable faster and more secure cross-border transactions.
- Financial sovereignty and infrastructure dependencies have emerged as key discussion areas: concentration and external dependency risks in payment systems should be balanced through local and regional solutions and common standards.
- Post-disaster reconstruction and regional development financing should be prioritized: keeping long-term credit channels open for SMEs, agriculture/farmers, and local enterprises—particularly in affected regions—was considered critical.
- Women's access to finance and financial inclusion are not only social goals but economic necessities for productivity and growth. In this context, impact-focused financing instruments (e.g., women-focused thematic issuances) should be expanded.
- Predictability and strong governance remain the most critical determinants of capital flows: regulatory frameworks, data security, transparency, and public–private coordination directly affect investor appetite.
- Long-term financing partnerships between the public and private sectors should be strengthened to ensure continuity of transformation; the financial architecture should be updated to support sustainable growth.

ISTANBUL ECONOMY SUMMIT 2025

FINAL DECLARATION

Within this framework:

- Through a long-term development finance approach, co-financing and catalytic capital models that mobilize private sector investments were effectively utilized. This enabled the creation of multi-stakeholder investment structures beyond single-source financing.
- Through digital capital market instruments, access to capital markets was expanded, the investor base diversified, and transparency, speed, and cost advantages in access to finance were achieved.
- By using digital financing tools, the continuation of credit flows for SMEs, agricultural producers, and local enterprises operating in disaster-affected regions was supported, directly contributing to economic recovery and the preservation of employment.
- Financing structures prioritizing social inclusion supported projects aimed at increasing women's access to finance, strengthening the multiplier effect of financial inclusion on growth.
- With support for digital infrastructure, fintech, and innovative financing solutions, the financial sector's capacity to adapt to technology was enhanced, paving the way for applications strengthening regional and global integration.

These outcomes demonstrated that, under the economy and finance theme, Istanbul Economy Summit 2025 functioned not only as a platform that discusses transformation, but also as one that enables it through financing and translates it into practice.

Industry and Production: Building Strategic Capacity

At the Summit, industry was addressed not only as an economic domain but as a strategic capacity. Automotive, defense industry, and advanced manufacturing technologies emerged as critical sectors in this period of restructuring global supply chains.

Key findings:

- Competitiveness is determined not by scale alone, but by technological depth and supply security.
- Domestic production capacity should be addressed together with R&D and qualified human capital.
- High value-added production is a fundamental element in overcoming the middle-income trap.

Energy and Sustainability: Resilient Ecosystems

The energy transition is not limited to diversification of production sources. At the Summit, energy was evaluated as the enabling infrastructure for industry, technology, and digitalization.

Key themes highlighted:

- Renewable energy investments should be planned together with storage and grid flexibility.
- Electrification and digitalization are structurally increasing energy demand.
- Energy infrastructures should be strengthened from cybersecurity and critical infrastructure security perspectives.
- The green transition is a development tool that reduces strategic dependencies.

Healthcare: Technology, Data, and Social Impact

The use of artificial intelligence and data in healthcare was addressed not only as technological progress but as a strategic transformation area for building a more sustainable, equitable, and people-centered healthcare system. While global life expectancy continues to rise, it was emphasized that healthy life expectancy is not increasing at the same pace, and that individuals spend a significant portion of their lives with chronic and preventable diseases. In this context, the primary objective of artificial intelligence and advanced data analytics was defined not merely as extending lifespan, but as increasing years of healthy, disease-free living.

Through early diagnosis, preventive healthcare services, personalized treatment, and clinical decision-support systems, the effectiveness of healthcare services can be enhanced while reducing cost pressures on healthcare systems. In particular, AI-supported early warning mechanisms for rare and chronic diseases were noted to shorten diagnosis times, reducing lost time for patients and their families and serving as a lever for strengthening equity in healthcare.

There was broad consensus that digital health solutions must be developed in line with ethical principles, data security, and human-centered design. It was emphasized that collaboration among public institutions, the private sector, academia, and international stakeholders would be decisive in realizing this transformation. In this context, AI- and data-driven approaches in healthcare were evaluated as key components for achieving not just longer, but healthier, more accessible, and more equitable lives.

Tourism and the Cultural Economy: A Value-Oriented Approach

The tourism sector is evolving toward a structure focused on value creation rather than volume, shaped by the experience economy, sustainability, and destination management. In an increasingly competitive global environment, it was emphasized that destinations should be evaluated not only by visitor numbers but also by the economic, cultural, and social impact they create.

Assessments at the Summit highlighted that tourism should be addressed as a holistic economic policy that supports local development, preserves cultural heritage, and places environmental sustainability at its core. In particular, culture, gastronomy, health, congress, and experience-oriented tourism were identified as strategic instruments that reduce seasonality risks while increasing value-added.

ISTANBUL ECONOMY SUMMIT 2025

FINAL DECLARATION

Key Themes Highlighted at the Summit:

- Branding and cultural heritage are fundamental elements of the long-term competitiveness of destinations.
- Tourism policies should be developed in alignment with environmental and cultural sustainability.
- Strengthening local economies is critical for ensuring that tourism revenues are distributed more broadly.
- Digitalization and data-driven destination management stand out as important tools that optimize visitor experience and resource utilization.
- The cultural economy should become an integral component of tourism, supported by creativity, design, and local values.

Women Leaders and Entrepreneurship: The Key to an Inclusive and Resilient Economy

The Summit strongly emphasized that the full and equal participation of women in economic life is not only a matter of social justice but also a strategic necessity for competitiveness, productivity, and sustainable growth. Global studies show that institutions with higher levels of women's leadership are more resilient to crises, more open to innovation, and better positioned to generate long-term value. In this context, stronger representation of women in decision-making mechanisms was evaluated as a fundamental component of economic resilience.

Organized Industrial Zones and the Green Economy: The Driving Force of Transformation

In the global green transition, organized industrial zones are evolving beyond spatial centers of production to become strategic implementation areas for energy efficiency, carbon reduction, circular economy practices, and digitalization. Assessments made within the scope of Istanbul Economy Summit 2025 revealed that, for the transition to a green economy to be effectively implemented, organized industrial zones should be addressed together with renewable energy integration, shared infrastructure investments, waste and water management, access to green finance, and skilled workforce transformation.

Within this framework, organized industrial zones stand out as structures that accelerate transformation, reduce costs, and enhance competitiveness through economies of scale at the intersection of industry, energy, and technology. For the green transition to be lasting and inclusive, it is critical that these zones evolve into ecosystems that not only comply with regulations but also develop innovative solutions, host pilot applications, and lead sustainable production.

Dark Factories and Autonomous Production Ecosystems

Another key topic highlighted at the Summit was "dark factories" powered by artificial intelligence, robotics, the Internet of Things, and advanced automation technologies. These production models, requiring minimal human intervention, represent a new competitive threshold in industry by enabling uninterrupted production, high quality standards, low error rates, and energy efficiency.

Dark factories are not merely automation models that provide cost advantages; they represent a comprehensive industrial transformation that enhances supply chain resilience, optimizes energy and resource use, and reduces carbon footprint. It was particularly emphasized that this transformation does not exclude qualified human capital, but rather redirects human labor toward higher value-added areas. In this context, dark factories were evaluated as a strategic industrial vision to be addressed together with green transformation, digital infrastructure, and 5G-supported production ecosystems in organized industrial zones.

Peace, Social Resilience, and Stability

At the Summit, peace was addressed not only as the absence of conflict, but together with democracy, equal opportunity, and social cohesion.

Key assessments:

- Social cohesion is an integral part of economic resilience.
- Migration, education, and employment policies should be addressed through a holistic approach.

A Sustainable Future: Mobility and Social Transformation

Sustainability has evolved beyond an environmental agenda into a multidimensional transformation encompassing industrial policies, technological change, social behavior, and economic competitiveness. Assessments at Istanbul Economy Summit 2025 emphasized that the success of sustainability requires a holistic approach spanning from production to consumption.

The automotive and mobility ecosystem stands out as one of the most visible areas of this transformation. Electrification, connected and autonomous technologies, software-defined vehicles, and AI-supported systems not only reduce environmental impact but also redefine user experience, efficiency, and safety. A sustainability approach covering the entire lifecycle—from production to end-of-life—has made reducing carbon footprints, implementing circular economy practices, and utilizing green energy strategic necessities.

ISTANBUL ECONOMY SUMMIT 2025 FINAL DECLARATION

Digitalization and artificial intelligence were evaluated as integral components of sustainability policies. Data-driven decision-making mechanisms play a critical role in energy efficiency, mobility planning, understanding user behavior, and resource optimization. In this context, there was a shared view that AI-supported systems should be developed not only with a technological focus, but also with an ethical, transparent, and human-centered approach.

From a societal perspective, sustainability was identified as being directly linked to transformation in individual behavior and consumer preferences. Growing interest in electric vehicles and environmentally friendly technologies is shaped not only by economic incentives, but also by trust, user experience, accessibility, and perceived long-term benefits. It was emphasized that consumers are adopting a more conscious, questioning, and data-driven approach to sustainability, while expectations for authenticity, measurability, and transparency are becoming stronger.

Communication and cultural transformation were also identified as decisive elements in ensuring that sustainability gains societal traction. It was emphasized that sustainability narratives should be built not on abstract promises, but on concrete practices, verifiable outcomes, and participatory models. This approach was noted to strengthen trust between institutions and society, while accelerating behavioral transformation.

In conclusion, the shared assessment that emerged at Istanbul Economy Summit 2025 is that a sustainable future can be built collectively across the axes of technology, data, industry, human capital, and social trust. This transformation can become lasting not only through regulations, but through cooperation, innovation, and a shared sense of responsibility.

Defense Industry: Strategic Resilience and Technological Depth

The defense industry has emerged as a strategic domain not only for security, but also for economic resilience and technological capacity, particularly in the current context of increasing global uncertainties, geopolitical risks, and supply chain vulnerabilities. Assessments made within the scope of Istanbul Economy Summit 2025 emphasized that the defense industry provides significant technology transfer to civilian industries through advanced engineering, software, artificial intelligence, sensor technologies, and high value-added production capabilities.

Strengthening domestic and national production capacity positions the defense industry as a central component of industrial policies. Beyond meeting security needs, this sector creates a multiplier effect in terms of export potential, qualified employment, and innovation ecosystems. There was broad consensus that technologies developed in the defense industry should be addressed in an integrated manner with sectors such as automotive, energy, aviation, software, and advanced manufacturing.

CONCLUSION AND JOINT CALL

Istanbul Economy Summit 2025 clearly demonstrated that global transformation should be managed not only with a focus on technology and growth, but also on trust, resilience, inclusiveness, and multilateral cooperation. Panels, special sessions, and engagements held throughout the Summit contributed to establishing concrete contacts among public institutions, the private sector, financial organizations, and international actors, and helped create new grounds for cooperation.

Within the scope of the Summit:

- direct contacts were established among stakeholders from different sectors regarding new investment, financing, and trade opportunities,
- common priorities and roadmaps were clarified in the fields of energy, technology, finance, industry, and digitalization,
- a shared understanding emerged regarding the need for alignment and coordination of economic policies among public institutions, the private sector, and international organizations.

In particular, assessments on energy transition, digital infrastructures, 5G and next-generation technologies, sustainable financing, human capital, and inclusive growth laid the foundation for collaborations that could evolve into concrete projects in the medium and long term. The Summit went beyond the exchange of ideas, creating a trust-based interaction environment that accelerated decision-making processes among participants.

Istanbul Economy Summit 2025 strengthened the role of Türkiye and Istanbul as regional and global centers for economic dialogue, investment, and cooperation, enabling stakeholders from different geographies to come together around a shared vision for the future.

9TH ISTANBUL GOLDEN VALUES AWARDS CEREMONY AND GALA NIGHT

Within the scope of the Istanbul Golden Values Awards Ceremony and Gala Night, institutions and organizations that stood out with their outstanding achievements in 2025 were honored with the 9th Istanbul Golden Values Awards. Taking the stage during the gala night, the ENBE Orchestra delivered an enjoyable and unforgettable performance with its distinguished repertoire and strong stage presence. The concert became one of the special highlights that completed the atmosphere of the evening.

The evening was hosted by our Executive Board Member and General Manager of Sentromer DNA Technologies, Pınar Akalın, together with our Board Member and Partner at Aşçı Etçi Benglian Law Partnership, Attorney Saro Benglian.

9TH ISTANBUL GOLDEN VALUES AWARDS CEREMONY AND GALA NIGHT

The Minister of Finance of the Republic of North Macedonia, Gordana Dimitrieska-Kochoska, expressed her pleasure in visiting Turkey as part of the Istanbul Economy Summit and in being hosted within the framework of the summit. On this occasion, she extended her thanks to Kaan Saltık, Vice Chairman of the Istanbul Economy Summit Board and Chairman of the Board at Koluman Holding, presenting a symbolic gift.

At the 9th Istanbul Golden Values Awards Ceremony, KoçSistem, recognized for its visionary approach in the field of digital transformation, was honored with the "Visionary Leader in Digital Transformation" award. The award was received by Ziya Özişik, Brand and Corporate Communications Group Manager at KoçSistem, and presented by Kaan Saltık, Vice Chairman of the Istanbul Economy Summit Board and Chairman of the Board at Koluman Holding.

Forma Makina, distinguished by its technological, engineering, and design capabilities in high value-added manufacturing, was awarded the "Innovation Leader in High Value-Added Manufacturing" prize. The award was accepted by Yeliz Akbaş Kırış, Vice Chair of the Board at Forma Makina, and presented by Hümeyra Gökçen Keskin, Chair of the Board at Agrotech.

Marie-Christine Oghly, recognized for her contributions to the global entrepreneurship ecosystem, her impact on women's entrepreneurship, and her role in fostering international collaborations, was honored with the "Outstanding Contribution to Global Entrepreneurship" award. The award was presented by Emine Erdem, Chair of the Board at SEDEFED and Board Member of the Istanbul Economy Summit.

At the 9th Istanbul Golden Values Awards Ceremony, Borusan Automotive, distinguished by its vision and innovative solutions in the field of sustainable mobility, was awarded the "Leadership in Sustainable Mobility" prize. The award was accepted by Hakan Tiftik, CEO of Borusan Automotive, and presented by Özlem Kestioğlu, Vice Chair of the Executive Board at Vodafone Turkey.

Astor Energy, noted for its innovative approach in energy technologies and contributions to sustainable infrastructure, was honored with the "Company Shaping the Energy Technologies of the Future" award. The award was accepted by Hakan Ünsal, General Manager and Board Member of Astor Energy, and presented by Anıl Güneri, General Manager of Güneri Makina, and Erhan Özmen, Chair of the Board at Özmen Un.

9TH ISTANBUL GOLDEN VALUES AWARDS CEREMONY AND GALA NIGHT

At the 9th Istanbul Golden Values Awards Ceremony, MOPA Exclusive, recognized for its strong international presence and influence in the kitchen sector, received the "Global Face of the Kitchen Industry" award. The award was accepted by Nurettin Varol, Chair of the Board at MOPA Exclusive, and presented by Uğur Gülek Balta, Chair of the Board at Uğurcan Customs Consultancy.

Bahçeşehir Koleji, distinguished for its innovative educational model and contributions to social impact, was awarded the "Sustainable Education and Social Benefit" prize. The award was accepted by Dr. Özlem Koç, General Manager of Bahçeşehir Koleji and Member of the Board of Trustees at Bahçeşehir University, and presented by Yıldırım Taş, Chief Advisor to the Chair of TÜRSAB and Vice Chair of the Board of the Istanbul Economy Summit.

İTÜ ARI Teknokent, noted for its contributions to the entrepreneurship and innovation ecosystem and its global impact, was honored with the "Leading Success in the Global Entrepreneurship and Innovation Ecosystem" award. The award was accepted by Prof. Dr. Attila Dikbaş, CEO of İTÜ ARI Teknokent, and presented by Furkan Tanriverdi, Chair of the Board at CITIO.

UNDP Turkey, distinguished for its socially impactful initiatives, received the "Contribution to the United Nations Sustainable Development Goals" award. The award was accepted by Faik Uyanık, Head of Communications at UNDP Turkey, and presented by Cem Öztürk, Regional President of Sanofi Eurasia and Vice Chair of the Board of the Istanbul Economy Summit.

The Türkiye Tourism Promotion and Development Agency (TGA) was recognized with the "Pioneering in Sustainable Tourism" award. The award was accepted by Vildan Şenteke, Group Manager of Sustainability and Competitiveness at TGA, and presented by Tolga Kılavuz, Board Member of H.P.M Hygiene Process Machines, alongside Gordana Dimitrieska-Kochoska, Minister of Finance of North Macedonia.

The Ankara University Rare Diseases Research and Application Center (NADİR), recognized for its innovative work in the field of rare diseases, was honored with the "National Impact and Innovative Health Solutions in Rare Diseases" award. The award was accepted by Prof. Dr. Tuba Eminoğlu, and presented by Kaan Saltık, Vice Chair of the Board, and Abdullah Değer, Chairman of the Executive Board of Istanbul Economy Summit.

8th ISTANBUL ECONOMY SUMMIT

Final Declaration

The 8th Istanbul Economy Summit brought together leading representatives of the business world, academics, and public administrators around the main theme of "Artificial Intelligence and the Economy." The summit explored how artificial intelligence is reshaping economic dynamics by addressing its impact on business, finance, healthcare, tourism, and public administration.

Main Themes and Key Topics

1. The Impact of Artificial Intelligence on the Economy and Future Strategies

Artificial intelligence enhances efficiency in business processes, reduces costs, boosts productivity, and strengthens decision-making mechanisms. In the financial sector, AI is heavily utilized in algorithmic trading and risk management applications. In healthcare, AI-assisted diagnostic systems improve early detection. In Türkiye, the use of AI in mammography screening has accelerated the diagnostic process. In the industrial and manufacturing sectors, autonomous factories and smart production systems are gaining prominence.

2. Türkiye's AI Strategy and Global Competitiveness

Türkiye is enhancing its global competitiveness by adopting AI-driven economic models.

Public-private sector collaborations play a critical role in shaping national AI policies. Digital transformation programs must accelerate the digitalization of SMEs and large enterprises.

3. Artificial Intelligence and Employment: Workforce Transformation

The impact of AI on the workforce must be carefully managed. New technologies are transforming certain jobs while making others obsolete. Investment in human capital is essential. Education programs must be revised to train experts in AI and data science. The future of professions and the adaptation of employees to new technologies should be supported through skills development initiatives.

4. Digitalization and Sustainability

Corporate sustainability strategies should be integrated with digital transformation processes.

AI-based solutions should be employed to improve energy efficiency and reduce carbon footprints. In the tourism sector, AI is enhancing customer experience and contributing to sustainable travel planning.

8th ISTANBUL ECONOMY SUMMIT

Final Declaration

Recommendations and Roadmap

National Artificial Intelligence Strategy

To position Türkiye as a global player in the field of artificial intelligence, it is essential to strengthen digital infrastructure and increase public-private sector collaborations.

The development of local AI technologies will reduce external dependency.

Education and Human Capital

Curricula in artificial intelligence and data science should be updated, and young talent should be encouraged to pursue careers in these fields.

Reskilling and upskilling programs must be expanded to transform the workforce and ensure adaptability to emerging technologies.

Artificial Intelligence and Legal Frameworks

AI-driven decision-making mechanisms must be shaped within ethical principles and robust legal frameworks. Strict regulations on personal data protection and data security should be enforced, and standards must be established to ensure fair and transparent use of AI.

Investment and Financial Support Mechanisms

AI entrepreneurs and the startup ecosystem should be supported through dedicated funds and incentive mechanisms to promote domestic technology development.

Both private and public sector institutions should increase investments in artificial intelligence technologies.

Global Cooperation and Türkiye's Positioning

Türkiye must enhance international cooperation in AI and digital transformation and take the lead in global projects that strengthen its competitive advantage. The Istanbul Economy Summit should continue to serve as a meeting ground for the international business community and academic institutions in this field.

Conclusion

The 8th Istanbul Economy Summit highlighted the critical role of artificial intelligence in economic and social transformation. It produced significant recommendations for Türkiye to adapt to the digital future and enhance its competitiveness. Hosted at Çırağan Palace, the summit continues to serve as a milestone in Türkiye's journey toward regional and global economic leadership. All stakeholders are invited to act with a shared vision to advance the digital economy and promote AI-driven innovation.

7th ISTANBUL ECONOMY SUMMIT

Final Declaration

The 7th Istanbul Economy Summit brought together industry leaders, academics, and experts under the strategic theme of "Sustainable Living and Smart Cities." This thematic focus offered a forward-looking vision that connected environmental issues, technological transformation, and urbanization processes to address the needs of future generations.

From an economic perspective, the summit explored the balance between fair income distribution, the use of natural resources, and economic growth within the framework of sustainable living. Panelists discussed how to foster sustainable economic development and how the business world can take the lead in this transformation.

A particular emphasis was placed on environmental topics, with in-depth discussions on the protection of natural resources, energy efficiency, and waste management. In this context, strategies for aligning economic activities with ecological balance were a key focus for the business community.

The economic dimensions of smart cities were explored, highlighting how technology, data analytics, and innovation can create value for the business world. Topics such as smart transportation systems, energy efficiency, digital infrastructure, and water management were discussed as key components of sustainability and competitive advantage.

7th ISTANBUL ECONOMY SUMMIT

Final Declaration

Panels of the 7th Istanbul Economy Summit:

- Multi-Dimensional Evaluation of "Smart City" and "Smart Tourism" Concepts
- Sustainable Mobility and Carbon Footprint
- Sustainable Health for a Sustainable Future
- Sustainable Living and Green Cities
- New Perspectives in Sustainability and Tourism
- Renewable Energy Conversion
- Business Relations Between Türkiye and Europe: Opportunities, Challenges, and Supply Chain Management
- Digital Transformation Across Sectors: 20 Years of Success Stories from İTÜ ARI Teknokent
- The Future of the Defense Industry in Its 100th Year

By uniting business leaders, academics, and technology experts, the summit fostered participant engagement and innovation. Interactive sessions aimed to generate practical solutions for the future of sustainable economies and smart cities.

The summit served as a vital platform for understanding how the economic world can navigate sustainability and technological transformation. It aimed to raise awareness among business actors on these crucial topics and laid the groundwork for strategic steps toward sustainable economic growth and the economic potential of smart cities.

ISTANBUL ECONOMY SUMMIT - BERLIN

FINAL DECLARATION

Aiming to deepen economic ties between Türkiye and Europe, the Istanbul Economy Summit brought together key stakeholders of the European business community through a special edition held in Berlin in 2023. With the main theme "Investment Opportunities in Türkiye for European Companies," the summit addressed Türkiye's multidimensional investment potential—from green transformation and digitalization to sustainable tourism and electrification in the automotive industry.

The insights and proposals emerging throughout the summit highlighted Türkiye's strategic role for global investors and focused on strengthening partnerships under the following key pillars:

1. Green Transformation and Circular Economy

Within the scope of the European Green Deal and carbon neutrality goals, Türkiye has positioned itself as a strategic partner in the transition to sustainable production and consumption models. The role of SMEs in this transition is being supported by both European investors and Turkish public institutions. Organizations such as KOSGEB (Small and Medium Enterprises Development and Support Administration) offer specialized financing models for this transformation.

2. New Horizons in Sustainable Tourism

Türkiye's policies on sustainable tourism have the potential to serve as a global model. The collaboration between TGA (Turkish Tourism Promotion and Development Agency) and the GSTC (Global Sustainable Tourism Council) aims to transform the accommodation sector and position Türkiye as a sustainable destination. For European investors, significant opportunities are available across coastal tourism and alternative tourism segments.

3. A New Course for Energy and Electrification

With its growing renewable energy capacity and industrial infrastructure, Türkiye is emerging as a key player in the electrification transformation of the automotive sector. Incentives offered by the Investment Office of the Presidency of the Republic of Türkiye, particularly those tailored to green energy investments, have drawn strong interest from international investors.

ISTANBUL ECONOMY SUMMIT - BERLIN

FINAL DECLARATION

4. Türkiye: Europe's Logistics and Industrial Hub

Efforts to modernize the Customs Union aim to make Türkiye a more integrated economic partner for Europe. With its strategic location, young and educated workforce, competitive cost structure, and developed infrastructure, Türkiye continues to serve as an ideal production and distribution base for Europe-based companies.

5. Multilateral Cooperation and a Shared Future

The strong economic ties between Türkiye and Germany extend beyond bilateral trade, contributing significantly to the European Union's sustainable development vision. The Berlin Summit reinforced the spirit of collaboration while also underscoring how cultural connections and interpersonal relationships enrich economic engagement.

Strategic Recommendations

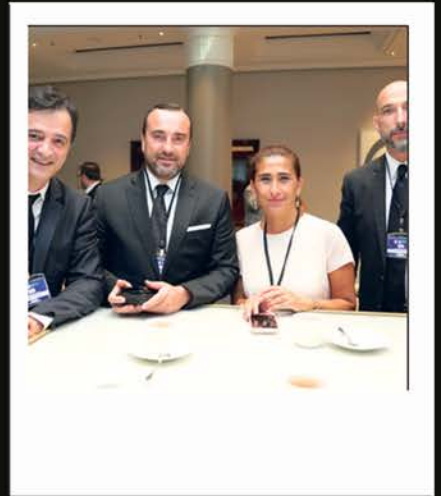

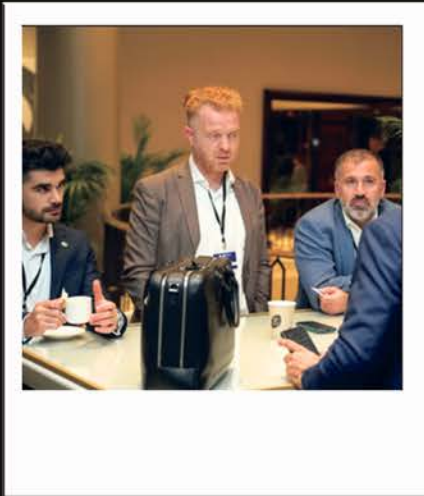

- Türkiye's potential in green energy and digital transformation should be prioritized in investment decisions.
- The process to update the Customs Union with the European Union should be supported, and mutual lobbying efforts should be strengthened.
- Joint financing models that accelerate the transformation of SMEs must become a cornerstone of EU-Türkiye cooperation.
- Collaborative R&D projects should be encouraged in leading sectors such as sustainable tourism, e-mobility, and innovative textiles.
- The diaspora in Europe, especially in Germany, should be more effectively utilized as a bridge in economic diplomacy.

The Istanbul Economy Summit is more than a platform for discussion — it is a visionary center that calls for action. Such gatherings are strategic steps toward deeper economic integration between Türkiye and Europe, laying the groundwork for a sustainable and inclusive future. The Berlin Summit was not only an invitation for investment but also a call for shared values and a collective future.

6th ISTANBUL ECONOMY SUMMIT

Final Declaration

The 6th Istanbul Economy Summit, held on December 1–2, 2022, at the Çırağan Palace in Istanbul, took place under the main theme of Global Value Chains. The summit brought together a wide range of participants—from business leaders and ministers to representatives of international organizations and academics—offering a strategic platform for discussions on the future of both the Turkish economy and the global economic system.

The summit addressed interrelated topics such as post-pandemic economic paradigms, geopolitical disruptions, digital transformation, energy transition, and sustainable development. One of the central focuses of this year was to strengthen Turkey's position in regional and global value chains.

1. Resilient Structures and New Hubs in Global Value Chains

A key issue highlighted during the summit was the need to redesign the fragile structure of global supply chains. In strategic sectors such as energy, food, technology, and pharmaceuticals, it was emphasized that moving away from centralized production models toward multi-centered and flexible networks is essential. Turkey was noted as being well-positioned to play a leading role in this transformation, thanks to its logistics, production capacity, and human capital.

2. Strategic Transformation Opportunities for Turkey

Speakers underlined that Turkey, with its strong connections to both Asia and Europe, could serve as a natural hub for transcontinental value chains. Through digital infrastructure, a green economy, and public–private partnerships, Turkey can be integrated into these chains with higher added value. The summit also called for support of the entrepreneurial ecosystem and the training of young talent in fields such as artificial intelligence and data science.

3. A New Economy Focused on Sustainability and Digitalization

Transformation was discussed not only in economic terms but also in environmental and social dimensions. For sustainable growth, efficient use of natural resources, reduced carbon emissions, and the integration of digital technologies into production processes were emphasized. In particular, it was stressed that sectors such as automotive, energy, and tourism must pursue digitalization and sustainability in tandem, with a focus on smart transportation, green production, and data-driven decision-making.

6th ISTANBUL ECONOMY SUMMIT

Final Declaration

4. Multilateral Cooperation and New Diplomatic Perspectives

The participation of high-level representatives from Albania, Azerbaijan, North Macedonia, and Kosovo underscored the significance of economic diplomacy. Joint projects, digital economy integration, energy cooperation, and mutual investment support programs were among the proposals discussed.

5. Sectoral Depth: Defense, Tourism, Energy, Health, and FinTech

Sector-specific panels brought key themes to the forefront:

- **Defense Industry:** Turkey's strategy to reduce foreign dependency through national technologies and its potential in global exports.
- **Tourism:** The rise of digitalization, personalized experiences, and AI-powered customer services.
- **Energy:** Developments in e-mobility, renewable energy investments, and sustainable infrastructure.
- **Health:** Use of digital twins, clinical decision support systems, and AI-assisted diagnostic technologies.
- **FinTech:** Data security, open banking, and AI-based credit scoring systems.

Conclusion and Recommendations

The Istanbul Economy Summit highlighted the following strategic steps for Turkey to become a strong, resilient, and agile actor in evolving global value chains:

- Digitalization and the green transition must be addressed together, with public policies designed to support this dual transformation.
- SMEs, entrepreneurs, and young professionals should be more actively involved in global value chains, with improved access to technology.
- Public-private cooperation must be expanded to ensure that major transformations are managed in a comprehensive manner—not just by the state.
- Regional cooperation networks should be established, particularly enhancing trade relations with the Balkans, Central Asia, and the Middle East.
- The investment environment should be made more attractive by ensuring data security, reducing bureaucratic hurdles, and increasing legal predictability.

The Summit's Mission: Istanbul's Global Role

The Istanbul Economy Summit continues to be one of the most comprehensive platforms not only for Turkey but also for Eurasia, capturing the economic pulse of the region. Gatherings like these, which will help shape the future of global value chains, are not only knowledge-generating but also serve as a call to action and policy-making. In this regard, the Istanbul Economy Summit has drawn a visionary, interconnected, and action-oriented roadmap, providing a strategic contribution to Turkey's economic future.

5th ISTANBUL ECONOMY SUMMIT

Final Declaration

The 5th Istanbul Economy Summit was held on December 10, 2021, at Çırağan Palace in Istanbul under the main theme of “Green Economy.” With broad participation from public institutions, private sector representatives, academia, and the media, the summit offered a multidimensional evaluation of Turkey’s role in the green transformation process and its opportunities for sustainable development in harmony with the global system.

Throughout the summit, interrelated topics such as climate change mitigation, environmental sustainability, digitalization, energy transition, and next-generation development models were discussed simultaneously. The potential leadership role Turkey could assume in this transformation was examined from various perspectives.

1. Structural Transformation and Sectoral Adaptation in the Green Economy

One of the key highlights of the summit was the need to balance economic growth with environmental sustainability. The importance of policies that would enhance resource efficiency, reduce carbon emissions, and support the circular economy model across agriculture, energy, industry, and services sectors was emphasized. In particular, the alignment between climate-focused public policies and private sector initiatives was considered a fundamental pillar of this transformation.

2. Digitalization, Smart Systems, and Green Technologies

Digital technologies were spotlighted as critical enablers of a successful green economy. From smart transportation systems and energy-efficient digital infrastructures to data-driven decision-making mechanisms and AI-supported processes, participants stressed the importance of integrating these tools into green transformation. It was underlined that green digitalization is not only an environmental imperative but also a strategic asset in terms of economic competitiveness.

3. Sustainable Finance, Investment, and Entrepreneurship

The summit frequently addressed the promotion of sustainability-oriented investments and the financing of environmentally friendly projects. There was a call to expand the use of financial instruments such as green bonds and sustainable funds. It was also noted that a new economic balance could be achieved through the leadership of public banks and the entrepreneurial drive of the private sector. Participants further emphasized the importance of supporting green entrepreneurship and social impact investing.

5th ISTANBUL ECONOMY SUMMIT

Final Declaration

4. Global Alignment, International Standards, and Climate Agreements

Turkey's alignment with international climate agreements—especially the European Green Deal—and global environmental standards was deemed essential for ensuring the sustainability of its export capacity. Participants highlighted the importance of being prepared for new regulations such as carbon border adjustment mechanisms and proposed the widespread adoption of environmental certification systems for exporters.

5. Employment, Education, and New-Generation Professions

The summit also addressed the new job areas, skills, and professions emerging as a result of green transformation. The importance of introducing young people to climate-friendly professions, increasing vocational transformation programs, and reshaping education policies to prioritize green skills was underscored. Additionally, the role of green transformation projects in empowering women's employment was emphasized.

Conclusions and Recommendations

The 5th Istanbul Economy Summit underscored that the transition to a green economy requires a multilayered transformation—not only environmental but also economic and social. The key recommendations highlighted at the summit include:

- Green and digital transformation should be designed together, and public policies should be redesigned to facilitate this integration.
- Innovative solutions that reduce carbon emissions should be supported, and energy efficiency and clean production practices should be scaled up.
- Green finance models should be developed, and the ecosystem for sustainability-focused entrepreneurship should be strengthened.
- Climate-resilient infrastructures should be built, and risk reduction strategies should be integrated into sectoral planning.
- Education policies should be restructured to focus on green skills and environmentally friendly professions.

Summit Mission: From Istanbul to a Green Future

The Istanbul Economy Summit continues to serve as a strategic platform of knowledge and guidance for policy-makers at both national and international levels during the green transition. With this summit, Istanbul further positions itself as a global actor with a comprehensive development vision that prioritizes both environmental and economic sustainability.

4th ISTANBUL ECONOMY SUMMIT

Final Declaration

The 4th Istanbul Economy Summit brought together public and private sector representatives, academics, and opinion leaders in Istanbul to discuss the restructuring of the global economy in line with sustainable development goals. The panels held during the Summit evaluated economic, environmental, and social transformation processes from a multidimensional perspective.

The main message of the Summit was the need for the current global economic system to evolve into a structure that both respects the planet's limited resources and ensures a fairer distribution of income and opportunity. In this context, the following themes stood out:

1. The Need for New Economic Paradigms

Global financial imbalances, increasing inequality, and the climate crisis have rendered current economic models unsustainable. The Summit emphasized the importance of shifting from growth-oriented economic policies to more inclusive, environmentally conscious, and human-centered models.

2. Green Transformation and the Digital Economy

The transition to green energy, low-carbon economies, and circular production systems was discussed as a fundamental component of sustainable development. Digital transformation was also highlighted as an effective tool for achieving sustainability goals. Participants proposed the use of technologies such as artificial intelligence, blockchain, and big data for sustainable economic planning.

3. The Role and Responsibility of Financial Systems

The financial sector holds the power not only to direct capital flows but also to influence the sustainability of investments. The Summit emphasized that Environmental, Social, and Governance (ESG) criteria must play a central role in financial decision-making processes. The widespread adoption of sustainable finance instruments was also underlined.

4. Global Cooperation and Multilateralism

Post-pandemic supply chain disruptions and geopolitical tensions have prompted a re-evaluation of economic dependencies. Summit discussions stressed the importance of strengthening international cooperation, maintaining multilateral trade frameworks, and fostering collective responsibility in development projects.

4th ISTANBUL ECONOMY SUMMIT

Final Declaration

5. Social Inclusion and Education

The Summit emphasized that global economic restructuring must prioritize not only economic growth but also social justice and inclusivity. It advocated for the development of policies and mechanisms that support the active participation of youth and women in the economy. The need to align education systems with digital and green skills was also highlighted.

Conclusion and Recommendations

The 4th Istanbul Economy Summit drew attention to the necessity of structurally redefining the global economy in order to achieve sustainable development goals. Based on the key takeaways from the Summit, the following strategic recommendations were presented:

- Environmental limits, social justice, and economic resilience must be addressed together in redefining the global economy.
- Investments in green energy, digital infrastructure, and the circular economy should be treated not only as environmental imperatives but also as strategic priorities.
- Public-private partnerships should serve as key levers in accelerating sustainable transformation.
- Financial systems must integrate ESG criteria into their decision-making processes, and green bonds and sustainable investment tools should be promoted.
- Multilateral cooperation mechanisms must be strengthened to achieve global development goals; economic relations should be rebuilt on the principles of trust, transparency, and mutual benefit.
- The active participation of youth and women must be ensured, and education policies should be swiftly implemented to equip individuals with digital and green skills.

The Summit served not only as a platform for discussion but also as a call to action. Following through on the recommendations shared during this journey toward sustainable development will contribute to establishing shared prosperity and environmental balance at both the national and global levels.

3rd ISTANBUL ECONOMY SUMMIT

Final Declaration

The 3rd Istanbul Economy Summit was held in Istanbul to assess Türkiye's and the world's adaptation to the emerging new world order in light of the rapid global changes and transformations. The summit addressed, in a comprehensive manner, the innovations in economic, technological, and social spheres—along with the opportunities and challenges brought by these developments.

1. Digital Transformation and Technological Advancements

With the rapid pace of technological development, digital transformation has become central to both business and society. The summit featured discussions on the impact of artificial intelligence, big data, and the Internet of Things on economic and social structures. In this context, it was emphasized that businesses and institutions must accelerate their digitalization processes and invest in developing a digitally competent workforce.

2. Sustainable Economic Models

Global economic uncertainty and volatility have increased the importance of sustainable and resilient economic models. The summit underlined the necessity of adopting green economy principles, circular production systems, and sustainable financing methods as essential strategies for long-term economic stability.

3. Education and Human Capital Development

Adapting to the new world order requires updating educational systems to align with future needs. Participants stressed the importance of integrating critical thinking, problem-solving, and digital literacy into curricula. Furthermore, fostering a culture of lifelong learning and ensuring that individuals continuously update their skills were highlighted as strategic priorities.

3rd ISTANBUL ECONOMY SUMMIT

Final Declaration

4. Global Cooperation and Multilateralism

In the face of globalization's opportunities and challenges, the summit emphasized the rising importance of international cooperation and multilateral diplomacy. Strengthening collaborative efforts in areas such as trade, security, and environmental policy was considered essential to building shared solutions.

5. Social Inclusion and Equality

In the emerging world order, adopting principles of inclusivity and equality is of great significance. Discussions focused on the need for concrete policies and practices that ensure gender equality, equal opportunity, and social justice.

Conclusions and Recommendations

The 3rd Istanbul Economy Summit recommends the following strategic actions in preparation for the new world order:

- Investing in digitalization and technology to increase competitiveness.
- Embracing sustainable and environmentally friendly economic models.
- Adapting educational systems to meet future demands and promoting a culture of lifelong learning.
- Strengthening international collaborations and supporting multilateral diplomatic relations.
- Mainstreaming social inclusion and equality into policy and practice.

The summit concludes with the conviction that through joint effort and stakeholder cooperation, both Türkiye and the global community can successfully adapt to the evolving global landscape.

2nd ISTANBUL ECONOMY SUMMIT

Final Declaration

Held in Istanbul amidst the economic uncertainty brought on by global trade wars, the 2nd Istanbul Economy Summit aimed to assess Türkiye's strategic position at both regional and global levels, its investment opportunities, and its resilient economic structure. The summit brought together representatives from various sectors—ranging from industry and finance to energy, construction, tourism, and transportation—as well as thought leaders and policymakers. Discussions focused on current global economic dynamics and Türkiye's vast potential.

1. The New Dynamics of Global Trade Wars

In an era marked by rising protectionism and the reemergence of trade barriers, Türkiye's production capacity and logistical strengths offer an attractive foundation for new investment routes. The summit emphasized Türkiye's role as a strategic bridge between Asia and Europe, highlighting its importance for emerging supply chains and regional trade networks.

2. Türkiye's Investment Climate and Sectoral Opportunities

Recent developments in key sectors such as industry, finance, energy, construction, tourism, automotive, and logistics were discussed in depth. The summit highlighted emerging investment areas focused on digital transformation, green transition, and high value-added production. Türkiye's incentive mechanisms, young and dynamic population, and strong growth potential were also underlined as key factors of interest for both domestic and international investors.

3. Financial Stability and the Importance of a Trustworthy Environment

It was stressed that fostering a strong investment climate requires financial transparency, legal certainty, and predictable economic policies. With global capital flows undergoing transformation, Türkiye's ability to strengthen its financial infrastructure was deemed essential.

2nd ISTANBUL ECONOMY SUMMIT

Final Declaration

4. Public-Private Partnerships and the Reform Agenda

To achieve sustainable success in global competition, the need for deeper cooperation between the public and private sectors was highlighted. Enhancing digitalization, R&D, green energy, and innovation efforts through public support is expected to create significant competitive advantages.

5. Regional Diplomacy and Multilateral Economic Relations

Despite ongoing global trade tensions, Türkiye must deepen its international cooperation through multilateral diplomacy and economic partnerships. Strategic alliances with alternative markets will enhance the country's economic resilience.

Conclusions and Recommendations

The Istanbul Economy Summit outlined the following strategic actions to help Türkiye maintain economic growth and maximize its investment appeal in the face of global trade conflicts:

- Support high value-added production in strategic sectors and boost R&D investments
- Implement pioneering policies in digital transformation, green transition, and sustainability
- Establish a transparent, robust, and investor-friendly financial market structure
- Strengthen the legal and institutional framework to ensure confidence among international investors
- Promote public-private cooperation and maintain a committed reform agenda
- Diversify Türkiye's multilateral economic relations to mitigate trade-related risks

The summit reaffirmed its belief that with the right policies and strong partnerships, Türkiye can capitalize on its strategic advantages and emerge as a regional investment hub amid the ongoing global economic transformation.

1st ISTANBUL ECONOMY SUMMIT

FINAL DECLARATION

The 1st Istanbul Economy Summit, held on December 25, 2017 at Çırağan Palace, was organized to assess the opportunities and challenges Türkiye faces in its digital transformation journey. With broad participation from public institutions, the private sector, academia, and civil society, the summit thoroughly explored the impact of Industry 4.0 on the Turkish economy.

1. Digital Transformation and Technological Innovation

Industry 4.0 refers to the digitalization of production processes, the rise of automation, and the integration of technologies such as artificial intelligence. The summit emphasized the need for Türkiye to strengthen its digital infrastructure, promote R&D investments, and support innovation in order to enhance its competitiveness during this transformation.

2. Education and Human Capital Development

The successful implementation of Industry 4.0 requires a qualified workforce. Participants stressed the importance of aligning the education system with the needs of the new era, increasing training in STEM fields (Science, Technology, Engineering, and Mathematics), and promoting a culture of lifelong learning.

3. Sustainability and Green Transformation

Industry 4.0 technologies contribute to sustainability through energy efficiency and responsible resource use. The summit highlighted the need to adopt environmentally friendly production methods, reduce carbon footprints, and implement circular economy models.

1st ISTANBUL ECONOMY SUMMIT

FINAL DECLARATION

4. Global Competitiveness and Cooperation

To strengthen its international competitiveness in the Industry 4.0 era, Türkiye must prioritize global cooperation. Strategic steps such as aligning with international standards, facilitating technology transfer, and encouraging foreign investment were identified as key actions.

5. Digitalization of SMEs

Small and Medium-Sized Enterprises (SMEs) form the backbone of the Turkish economy. The summit emphasized the importance of integrating SMEs into the digital transformation process by increasing financial support and improving digital literacy.

Conclusions and Recommendations

To succeed in the Industry 4.0 transition, the Istanbul Economy Summit proposes the following strategic actions:

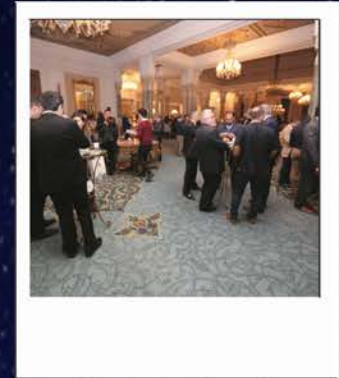

- Strengthening digital infrastructure and increasing technological investments
- Aligning the education system with Industry 4.0 and developing a qualified workforce
- Adopting sustainable and environmentally friendly production models
- Enhancing international cooperation and compliance with global standards
- Supporting the integration of SMEs into the digital transformation process

The summit affirms its belief that through collaboration and joint efforts from all stakeholders, Türkiye can successfully advance in the Industry 4.0 era.

10th ISTANBUL ECONOMY SUMMIT

Sponsorship Options

COMMON BENEFITS APPLICABLE TO ALL SPONSORSHIP PACKAGES

The following benefits apply to all sponsors, regardless of package type:

- Presentation of an award by a sponsor representative to a selected organization during the Istanbul Golden Values Awards Ceremony.
- Invitation of sponsor representatives to the stage during the opening program and an official group photo with all sponsors.
- Inclusion of the company name and logo in the official Istanbul Economy Summit e-magazine prepared specifically for the Summit.
- Use of the company logo in the official thank-you email to be sent after the event.
- Inclusion of the company name and logo in Istanbul Economy Summit media promotions (including TV, radio, newspapers, magazines, and outdoor media).
- Placement of sponsor logos within joint branding materials featuring all sponsors; including screens during the press conference and throughout the Summit, badges, and all branding areas located inside and around Çırağan Palace.

GUEST POLICY (GENERAL PRINCIPLES)

Participation rights provided within sponsorship packages are divided into two categories: Panel Ticket (access to all panels, keynote speeches, and daytime activities) and VIP Ticket (includes Panel Ticket benefits plus access to the gala night).

- All tickets are personal; any name changes must be notified in advance.
- A balanced representation of women and men from the business world (50% – 50%) is observed in guest profiles.
- The organization reserves the right to coordinate participant lists in order to preserve the representative nature of the Summit.
